

# THE BLAIRMORE ENTERPRISE

VOL. XXXVII, NO. 26.

THE BLAIRMORE-ENTERPRISE, FRIDAY, JULY 5, 1946.

\$2.00 PER ANNUM

"Serve the Church that the Church May Serve You."

**CENTRAL UNITED CHURCH**  
BLAIRMORE  
Rev. James McKelvey, Minister

Services Sunday next:  
11.00 a.m., Senior school.  
2.00 p.m., Junior school.  
7.50 p.m., Public Worship.

**SALVATION ARMY, COLEMAN**  
Captain and Mrs. T. Smith,  
Officers in charge.

Sunday services:

11 a.m., Holiness meeting.  
2.30 p.m., Directory class.  
8 p.m., Sunday school.  
7.30 p.m., Salvation meeting.  
Tuesday: 7.30 p.m., Red Shield Auxiliary and Home League.  
Thursday: 8 p.m., Praise meeting.  
Funeral dedications and marriages on application to the local officers.

**HILLCREST UNITED CHURCH:**  
Services every Sunday at 8 p.m.

**BELLEVUE UNITED CHURCH:**  
Services at 7.30 p.m. every Sunday.  
**COWLEY UNITED CHURCH:**  
Services alternate Sunday mornings at 11 o'clock.  
Rev. W. H. IRWIN, Minister.

**BELLEVUE BAPTIST CHURCH**  
Pastor: Rev. Fred Bennett

Sunday school 10 a.m.  
Morning worship 11 a.m.  
Evening service 7.30 p.m.  
Midweek meeting:  
Wednesday 7.30 p.m.  
A cordial welcome awaits you.

**BLAIRMORE SCHOOL DISTRICT**  
No. 628

## NOTICE to PARENTS

Children who intend to begin school in September must be six years of age by August 31st, and be registered at the Town Office before July 15th.

BLAIRMORE SCHOOL BOARD.

## HISTORY REPEATS ITSELF!

Do you know that women's styles run in cycles? Be-featured hats were the vogue in the early nineties, and in 1946 they are a fashion first again. The hat above, which appeared in EATON'S Spring and Summer Catalogue of 1894, compares in style to the smaller editions on display in our millinery department today. But whether it's 1894 or 1946, people in Western Canada know that the NEW styles always appear in EATON'S catalogue.

**T. EATON & CO. LIMITED**  
EATON'S

## COWLEY HAPPENINGS

(June 27th)

W. O. Nick Papp returned home on Wednesday of this week from spending several years with the forces overseas. His English wife will follow him in due course when together they will make their home here.

Little Barbara Tustian has returned from Pincher Creek where she was a patient in St. Vincent's hospital for the past week.

A. Wende is a business visitor to the Nelson, B.C. district this week.  
Mrs. Malcolm McMillan is a patient in St. Vincent's hospital in Pincher Creek.

Miss Peggy Slade, of Vancouver, B.C., is the guest of Mr. and Mrs. Griffith Parry and family this week.

Armand Lemire has returned home for the summer holidays from attending the past term at St. Anthony College in Edmonton.

Mr. and Mrs. Lawrence Bent, of Calgary, are on a vacation visit at the parental home of Mr. and Mrs. W. E. Bent here. Together with their guests the Bent party are holidaying at Waterton Park this week.

Mrs. Ervin Feller was honored with a miscellaneous bridal shower which was held in the Masonic hall on Wednesday evening when a large crowd of friends gathered to do her homage, at which C. J. Bundy made the presentation speech, to which the bride readily replied. The early part of the evening was devoted to cards, court whist being in order with the honors going to Miss Doris Musgrave, ladies' first; consolation, Mrs. P. Ivasiak; gent's first, P. Ivasiak; consolation, L. A. Feller. Merriment on this occasion was concluded with dancing. The happy couple will make their home in Bellevue.

Wal. day, of Creston, B.C., has returned to the old farming grounds and was renewing old acquaintances here this week. Mr. Eddy is recovering from an injury sustained through a fall a couple of weeks ago, otherwise he is hale and hearty. He now is well past 80 years young.

Rainy weather continues with us this week, holding up summer folk. Just now there is considerable bit of sod breaking being done in this district, with the recent heavy bit of moisture here, conditions were never better for turning the virgin soil.

Mrs. Horace Poulsen, a Holland bride, when arriving in Calgary, was met by her husband on June 21st finishing the long journey by motor car to Cowley where they have taken residence on a ranch and in future will engage in diversified farming. Horace served several years in the armed forces overseas.

The farmers' picnic, held under the auspices of the local branch of the Alberta Farmers' Union at Olin Creek bridge on Friday, June 21st was a huge success. Chief spots consisted of baseball played off by Willow Valley, Cowley, Lundbreck and Porcupine Hills teams; foot races and sundry amusements were in order for the younger generations. Refreshment booths were on the grounds, doing a roaring business. The day was concluded with a big dance at night which was held in Cowley.

(July 4th)

A tea and miscellaneous sale of home cooking, sewing, etc., was held under the auspices of the Women's Auxiliary of the Anglican church here in the Masonic hall on Saturday afternoon, June 29th. The hall put on a festive air with tea tables bearing bouquets of yellow roses and other garden flowers. In spite of inclement weather, the patronage was good. The neat sum of \$24 was realized.

Miss Nora Link, who has been head of the telephone exchange here for two years, has been transferred to Waterton with the vacancy here being filled by Mrs. Roy Burn, of Lundbreck.

Mr. and Mrs. Roy Burn and family of Drumheller paid a visit at the par-

## SUCCESSFUL MUSIC STUDENTS

The following is a list of successful candidates in examinations held recently by the Toronto Conservatory of Music in Blaimore. The names are arranged in order of merit, all in piano:

Grade VII. Pass, Cecelia Young.  
Grade V. First-class honors, Constance Alexander.  
Grade IV. Honors, La Rene Himman.

Grade III. First-class honors, Richard Spooner; honors, May Hozek, Irene Knight, Audrey Hotte.

Grade II. First-class honors, Josephine Sekina, Robert Mott; honors, Doreen Vajprava, June McNeill, Frankie Oliva; pass, Diana Guard and John Hilbert equal.

Grade I. First-class honors, Lorna J. Hallworth, Robert Hallworth; honors, Shirley Mattson, Margaret A. Vejprava.

ental home of Mr. and Mrs. W. E. Bent this week. Mrs. Bert Connelly, of Lundbreck, was also a guest at the Bent home the early part of the week.

Jimmie Gunn, of Turner Valley, paid a visit to his parents, Mr. and Mrs. Harry Gunn, over the week end. Mrs. X. C. Kaupp and daughter Darlene will be leaving shortly for a months vacation at Radium Hot Springs, B.C.

Mr. and Mrs. Griffith Parry and their children Margaret Anne and Jimmie are on a month's holiday vacation in the city of Calgary.

A miscellaneous shower was given Miss Marjorie Murphy in the Masonic hall on Tuesday evening, July 2nd, when a number of friends gathered to do her homage. Wilfred Fortier being spokesman, made the presentation speech, when on behalf of the people present, wished much happiness and a long and prosperous life to the young couple who will launch upon the road of married life sustained on Thursday of this week, to which the fete party neatly responded. For entertainment progressive whist was played with prizes being captured by Mrs. L. A. Feller ladies' first; second Miss Eileen Burwell; gent's first, Willie Musgrave, second, Hector Lemire. Merriment was concluded in a lively dance with music being supplied by Mrs. X. C. Kaupp and Miss Ella Wende at the piano.

A pretty wedding was solemnized in St. Joseph's church here on Saturday, June 29, when Anne Marie, eldest daughter of Mr. and Mrs. Nick Papp, became the wife of Mr. Adolph Pettit, all of Cowley. Rev. Father Leo Bartley performed the marriage service. The bride, who was led to the altar on the arm of her father carried a bouquet of opheelia roses and was exquisite in a floor-length gown of ivory duchesse satin with the train of her sweeping veil being carried by two little flower girls, Annie Loucw and Mary Kotzky, who were exceptionally sweet in floor-length dresses of canary yellow satin. The bride was attended by her three sisters, Misses Irene, Isabel and Rose Papp, who also wore floor-length gowns of tri-ple sheer in pastel shades of blue and rose with matching shoulder-length veils, each carrying bouquets of garden flowers and fern. Mrs. Annie Zam was matron of honor and was gowned in floor-length heaven blue triple sheer with matching figure-tip veil and carrying a bouquet of rose and white carnations. The groom was supported by his half-brother, Louis Bourdier, and W. O. Nick Papp; brother of the bride, and Brown's matron and Dannie Pettit, also brother of the groom. Following the wedding a reception was held in the Cowley Opera house, where a hundred and fifty covers were laid for guests, after which dancing was enjoyed into the " wee wee " hours. The happy couple couple are honeymooning at southern Alberta points and on their return they will take up residence on a ranch in the Porcupine Hills district.

## AN OLD-TIMER HONORED

On the afternoon of Thursday, July 4th, twenty members of the Ladies' Aid of the United church met at the home of Mrs. L. P. Robert to honor Mrs. J. Angus MacDonald, who has and First Aid Association Monday been a member since its organization in 1904.

The honor guest was presented with a handsome leather writing case by the president, Mrs. J. J. Murray, and was a corsage of roses by Mrs. C. the Greenhill mine, Blaimore, third.

Mrs. MacDonald was also presented with an album containing "snaps" of old-timers, as she is much interested in the early history of Blaimore and has written articles on the early days. This album was artistically prepared and presented by Mrs. Robert and proved very interesting to all the members.

A delicious lunch was served by members of the Aid, which brought a very pleasant afternoon to a close.

## UNDULANT FEVER CASES REPORTED IN CALGARY

Several cases of undulant fever, none of them believed to be serious, were reported in Calgary this week by a prominent doctor who said he had been treating the patients in hospitals and at their homes.

Dr. W. H. Hill, medical officer of health, said he knew of no cases of the fever, and that none had been reported to his department in the past six years.

The source of the disease, also known as Malta fever, in undulant fever, is it is sometimes contracted through the handling of meat infected with the bacillus melitensis organism. The only two cases of undulant fever reported during the past 15 years in Calgary were those of butchers.

The doctor who told The Herald of the occurrence of the disease said it was a chronic type, and few cases were acute. In nearly every case, the illness had been wrongly diagnosed as rheumatism, as the symptoms are similar. Undulant fever, however, is notable for its high fever which fluctuates during the period of the illness.

No unpasteurized milk is sold commercially in Calgary as all licensed distributors of milk sell only the pasteurized product. Some householders who prefer raw milk make arrangements to buy it from the country, and there is danger of undulant fever breaking out in this way.

Dairy herds are tested periodically for Bang's disease, which also causes undulant fever.

## GREENHILL WINS

### RESCUE CONTEST

Greenhill mine, Blaimore, was winner of the annual mine rescue contest held at the Crow's Nest Pass Mine Rescue home of Mrs. L. P. Robert to honor Mrs. J. Angus MacDonald, who has and First Aid Association Monday been a member since its organization in 1904.

Bellevue mines was second w/t, the Hillcrest Mohawk mine third.

Winner of the senior first aid contest sponsored by the association was the Greenhill mine, Blaimore, third.

The junior first aid contest was won by Bellevue with Blaimore and Hillcrest in second and third place.

Judges for the events were: Mine rescue, H. B. Lake, Blaimore, W. Wilton, Cannore, L. McDonald, Coleman, Evan Morgan, Lethbridge; senior first aid, J. Owen, Michel, Dr. J. M. Hutchinson, A. E. H. Starr, and Dr. L. Hill, Calgary; junior first aid, R. M. Greenhalgh, Coleman, A. Marks, A. McKay, Blaimore, H. Millar, Bellevue.

Following the contest the winning teams were guests of the association at a smoker.

## BLAIRMORE PUBLIC LIBRARY

Among new books added to the Blaimore Public Library recently are the following:

The Four Graces, D. E. Stevenson.  
Burns Surgeon Returns, G. S. Sea-

grave.  
Old Doc, E. Seifert.

Secret of the Lake House, J. Rhode.  
Earth Could be Fair, Pierre van Paassen.

The Devil's Steps, A. W. Upfield.  
I Heard Them Sing, F. Reuber.  
Trouble at Turkey Hill, K. M. Knight.

The Islanders, E. Foster.  
Cartoon Road, A. Sullivan.

Nine Days' Murders, A. Mackinnon.  
Wasteland, J. Sinclair.

Lord Hornblower, G. S. Forester.  
Eskimo Summer, D. Leshchian.

The Charity Ball, J. Scott.  
Valley Boy, Theodore Brant.

The Gallant Years, A. Powers.  
The Invisible Sun, M. Lee.

Yankee Storekeeper, R. E. Gould.  
Man-Eaters of Kumaon, J. Corbett.

The Unreasoning Heart, C. Beresford-Howe.

Tempered Blade, M. Barrett.  
William and the Emperor, L. Gibbs.

Sarah Mandrake, M. C. Waeleton.

The convention of the Alberta division of the Canadian Weekly Newspapers will probably be held in Lethbridge toward the end of September, it was decided at a meeting in Calgary of the executive.

## HILLCREST HAPPENINGS

Mr. Don Grant of the staff of Central Alberta Sanatorium at Calgary, is home for the week end to attend the wedding of his sister, Christina Grant, to Mr. Cyril Pitt, of Blaimore.

Mrs. F. Harquail is on a business trip to Montreal.

Mrs. A. Chrysler and young daughter of Calgary are guests of Mrs. Chrysler's parents, Mr. and Mrs. R. Christon.

Misses Chrissie Smith, Betty Luini and Margaret Hyslop are doing hospital aid work in Lethbridge during the summer vacation.

Fergie Grant, who has been attending the University of Alberta, arrived home on Saturday.

Mae Dudley and Allie Greaner left on Monday for Edmonton to attend summer school.

Mrs. F. Norton and daughter Margaret, of Vancouver, are holiday guests of Mr. and Mrs. G. Fry.

Mr. and Mrs. W. H. Moser and family left on Sunday by car for a vacation at the coast.

Mr. and Mrs. W. Webster and Lamon are spending the summer months on their farm at Mountain View.

Dr. and Mrs. R. Burghman and son have taken over MacPherson's apartment, in Blaimore, for July and August.

Georgio Perora is spending his summer holiday with his parents in Cranbrook.

Mr. and Mrs. C. Seville are visiting in Calgary this week.

Mr. and Mrs. J. Maguire and family motored to Lethbridge for the week end.

Mr. and Mrs. Kosa have returned to Hillcrest to live. They have been residing in New Westminster for the past two years.

Mr. G. E. Cruickshank was a business visitor in Calgary for a few days last week.

A beautiful wedding service was solemnized in the Hillcrest United church, on Friday, June 28, at 4:30, when Christina Florence, second daughter of Mr. and Mrs. D. A. Grant, became the bride of Cyril Stanley, eldest son of Mr. and Mrs. Pitt of Blaimore. The church was tastefully decorated for the occasion with pale green streamers and rose peonies. At the appointed hour the bride entered the church on the arm of her brother, Donald Grant, who gave her in marriage. Mrs. W. H. Moser presided at the organ. The bride was beautiful in a chartruese afternoon dress with white hat, shoes and gloves. Mae Dudley, as bridesmaid was gowned in a cerise afternoon dress with which she wore white accessories. Clarence Pitt, brother of groom was best man. Rev. W. H. Irwin, performed the marriage service.

After the ceremony a reception was held at the home of the bride's parents, over thirty friends and relatives were present. The bride's table was centred with a three tiered wedding cake and flanked by rose peonies in crystal vases. The happy young couple will reside in Hillcrest, after a honeymoon in California where they will visit the bride's eldest brother.

## WATERPROOF COTTONS

It is now known that during World War II an epoch-making discovery was made by Britain's textile industry, namely the manufacture of cotton materials which are completely waterproof. At present it is hardly possible to assess the value of this discovery to the textile industries of the whole world. The new materials have made their first appearance at a fashion display in Manchester and have aroused great admiration among experts from all nations.

Last week Mr. Kovach, accompanied two friends of New York City, U.S.A., arrived by motor to spend a few days with his niece, Mrs. John Lloyd, and Mr. Lloyd.

## For a Cheery Breakfast— Irish Linen Plus Vitamins

A SUCCESSFUL school day starts with a good breakfast eaten in pleasant surroundings. And what could be pleasanter than sitting down to this breakfast table set with white dishes and a bright red and white cloth? This one was made by joining four Irish linen dish towels together with red rickrack braid. The napkins were made of plain white sewing edged with the rickrack.

WORLD HAPPENINGS  
BRIEFLY TOLD

Dr. Richard Bowen was unanimously re-elected president of Czechoslovakia.

N. M. Bentley of the Alberta school of agriculture, Vermilion, was elected president of the western Canadian society of agronomy.

A memorial plaque to the late Sun Yat-Sen, founder of the Chinese republic, was unveiled at the London boarding-house where he once stayed.

An estimated 600,000 unemployed persons in metropolitan Tokyo are to be registered and classified in the expectancy of the reopening of peace-time industries in the near future.

The British admiralty ordered the preservation as a memorial of "D-Day" the huge map used by the Allied officers to direct the invasion of Europe June 6, 1944.

Senator L. M. Gouin (I., Quebec) called for special study by a senate committee of how July 1 should be made into an adequate and appropriate holiday designed to further national unity.

Herbert Hoover reported an improvement in the world food outlook as a result of Latin American cooperation in making available 800,000 extra tons of cereals and beans for the next few critical months.

Canadian servicemen in the United Kingdom and Europe totalled 28,832 at June 3, it was reported in information tabbed in the commons. The army had 23,586; the navy, 475 and the air force 4,771.

## Ice Cream

Form Of Seaweed Is Said To Enter Into Its Manufacture

Did you know that seaweed goes into the manufacture of your favorite ice cream?

This fact, however, is not as startling as it sounds. Sodium alginate, a chemical product derived from certain types of seaweeds harvested off the coasts of Eastern Canada, California, Ireland and Scotland, forms an important ingredient of ice cream, according to an article in the current issue of C-I-L Oval.

A number of varieties of alginate products exist and a different seaweed gives different properties to the alginate acid or alginate made from it. The properties of the alginate manufactured from one weed species, however, are consistent and exactly reproducible, the article states.

Alginates are used wherever thickening, stabilizing and jelling properties are required—such as ice cream, chocolate milk and cold milk custards. These "seaweed" delicacies taste no different from those made with gelatin.

The article forecasts wide industrial use of alginates in textiles, paper coatings, transparent film, paints, cosmetics, pills and insecticidal compositions.

## Increased Yield

Rust-Resistant Varieties Of Wheat Have Paid Big Dividends

Manitoba produced 15,000,000 more bushels of wheat last year as a direct result of growing 2,000,000 acres of rust-resistant varieties, Dr. W. F. Hanna, chief of the Dominion plant pathology laboratory at Winnipeg, told the Canadian Seed Growers association.

Similar figures could be quoted for Saskatchewan yet the entire cost of the rust research program for the last 20 years did not exceed \$2,000,000.

Commenting on the reported excess of Canadian wheat grown down to the United States, Dr. Hanna said that unless more money was provided for research and research workers, progress was bound to be stilled.

## Thanked For Help

British Appreciated The Efforts Of Canadian Women Sold Viscountess Alexander

Large supplies of oranges and milk, large newspapers and envelopes which were used only once are details of Canadian life which impress anyone arriving from Britain, Viscountess Alexander said in speaking to the Ottawa Women's Canadian club.

The Governor-General's wife thanked the women of Canada for their help to Britain during the war. The Red Cross had helped to finance 100 war nurseries, the Junior Red Cross had sent comforts, the I.O.D.E. had sent clothing, the Kinsmen club milk and the Queen's Canadian Fund kitchen utensils and household goods.

## JOY SHORT-LIVED

Home, folks like to tell you, is where the heart is. And in that case—Tom Jensen of Stoughton, Wisconsin, was living in his mouth. He drove out on the edge of town to look at his newly completed house. It was beautiful. Fresh white paint, green shutters. New pine tree in the front yard. Everything wonderful.

...until Jensen peered around and noted the house was standing on someone else's property.

WRECKAGE IN WAKE OF TWISTER AT WINDSOR TAKES QUEER SHAPES—Queer tricks were played by the twister which carried wreckage and debris for miles from the stricken area. This unusual setting for a plane doesn't seem to bother the calf which calmly continues grazing. Some animals were up to knees in water.

BEWARE SUMMER HAZARDS  
WARNS HEALTH WRITER

"It's our first peacetime summer—let's make the most of it," advises Jean Lambert in an article in the forthcoming summer issue of Health, official journal of the Health League of Canada.

Miss Lambert, assistant to the managing editor of Health, warns against excessive sunbath, pollen, undue fatigue, tells about the dangers of drinking untreated water and unpasteurized milk, and advises vacationists to learn to swim "before you paddle your own canoe."

In regard to sunbath, the writer advises that it takes a full two weeks to sunbathe safely. First exposure shouldn't exceed 10 minutes in the morning and 10 in the afternoon. "Unless we realize that a sunburn is real burn—just as real as though we placed a hand on a sizzling hot stove—we're in for trouble," writes Miss Lambert, as she advises that, while many of the sunbath lotions on the market help to prevent excessive burning, they are not a cure for burns.

Poison ivy looks like Virginia Creeper, but has three leaves instead of five. It is very irritating—growing mostly in waste places, equally at home in rich woodlands or near bathing beaches. Miss Lambert warns that all parts of the plant—leaves, flower, fruit, bark or roots—are equally poisonous.

Miss Lambert says that this plant's poison can be carried by clothes which have come in contact with the plant, particularly if the clothes are damp at the time of contact. Animals walking through the plants also will carry it.

"If you do become involved with poison ivy, don't scratch, and remember that your greatest friend is cheap laundry soap which gets down to business with the oily poison," advises the writer. "Use soap generously; scrub well with soap and water. Do this under running water several times."

The article warns against the drinking of water which appears clean but possibly could be contaminated by boiling or by chlorinating. Also, the common dipper should be avoided. Water piped in from a municipality which tests and treats its water is safe, but if that water is put into a cooler, it must be purified in the same way as well or spring water. Home chlorinating outfit or information are available at most provincial departments of health.

Vacationists are advised against use of unpasteurized milk, and Miss Lambert suggests that home pasteurization methods be used if milk which has been pasteurized commercially is not available. These home methods can be obtained by writing to the Health League of Canada, 111 Avenue Rd., Toronto, or to your health department. The article emphasizes that the use of milk in a raw state involves unnecessary risk because while milk is one of the best foods available, it unfortunately is easily contaminated by disease-causing bacteria. This applies even to milk produced under the most sanitary conditions. Yes, even clean milk is not necessarily safe.

The use of pigeons as messengers goes back to 3500 B.C.

## Making Progress

Vancouver Ex-Sailor Getting Along Fine On Canoe Trip

THE P.A.S. Man.—Tanned, quiet-spoken, O. P. Smith, Vancouver, arrived recently at this Saskatchewan River town, 500 miles north of Winnipeg, his canoe trip from Vancouver to New York half completed. The middle-aged ex-sailor placed his 16-foot craft in the Fraser River April 11 and proceeded via the Peace, Athabasca and Saskatchewan Rivers. He carried with him a letter from the Mayor of Vancouver, addressed to Mayor O'Dwyer of New York, and he expects to deliver it within two months.

Mr. Smith plans to travel down Lake Winnipeg to the Winnipeg River, strike east towards Lake Nipissing, then cross southern Ontario to the Erie Canal. From New York, he may make a side trip to his birthplace at Cairo, Ill.—by canoe, of course.

## Attract Tourists

Wins First Prize For Best Travel Exhibit At Minneapolis

First prize for the best travel and tourist exhibits at the 13th annual Northwest Sportsman's Show held in Minneapolis last April has been awarded to the Canadian Government Exhibition Commission, Leo Dolan, Canadian Travel Bureau chief, announced.

He estimated the exhibit, which already has been shown at Cleveland, Chicago and Milwaukee, will be viewed by approximately 1,000,000 prospective American tourists this year. A section of it was on display at the Kiwanis International convention in Atlantic City.

## CEMENT SHORTAGE

CALGARY.—The Calgary Albertan said in a newspaper story that cement shortage has all construction in the city at a standstill.

## LIFE'S LIKE THAT

By Fred Neher

"But, darling, don't you remember that we were married by proxy while you were away?"

## REG'LAR FELLERS—Experimental Station

## Flax Seed Production

The Need For Flax Seed Still Is Urgent

Canada produces an excellent quality of flaxseed for all purposes but history shows that its production in the Dominion has been more or less a spasmodic undertaking. Production dates back to pioneer days, when 54,600 pounds of flaxseed were produced in New France in 1720. In 1864 production was stimulated at Baden, Ontario, by the preparation of flax products and about 1875 flaxseed was first introduced into Western Canada. An area of over two million acres was grown in 1912 which, declining sharply during the First World War and post-war period, had fallen to a low level in the Thirties. In 1933 the flaxseed acreage and production dropped to the lowest level in over 20 years, the area sown amounting to 243,600 acres and the production to 832,000 bushels. At the outbreak of the Second World War Canada was still on an import basis as regards flaxseed.

Soon after 1939, a shortage of oil developed and supplies of linseed oil were diverted to uses not practical in normal periods. In order to stimulate production the government set a fixed price of \$3.25 per bushel with no quotas restricting the delivery of flaxseed. Production reached a new peak in 1943 when 2,947,000 acres were seeded to flax. In view of the urgent need, the fixed price was advanced to \$2.75 per bushel for the 1944 crop and \$2.25 for the 1945 crop. However, the 1944 crop was reduced to 9,668,000 bushels and in 1945 dropped further to a little over seven million bushels.

This history appears incidentally in "The Production of Flaxseed in Canada" by W. G. McGregor, Cereal Division, Experimental Farms Service and is published by the Dominion Department of Agriculture. In this publication (No. 545), important information is given about all phases of flaxseed production, including linseed flax as compared with other crops, where flax may be grown, seeding, harvesting, weed control, varieties, disease control, and insect pests. The market and the encouraging outlook for flax is also dealt with. A copy of the publication may be obtained by writing to Dominion Department of Agriculture, Ottawa.

## Returns To Britain

Dr. Cockcroft Was Head Of Atomic Research In Canada

After two years of atomic research in Canada, Dr. J. D. Cockcroft has returned to Britain to take charge of the British atomic research station in Berkshire. Dr. Cockcroft said the United States was bound to be ahead of Britain in atomic research because it had all the plant and equipment on the energy we put into the job how we shall catch up," he added.

In Canada there was a team of 2,000 scientists. Ultimately there would be at least that number at the British station, where work has been progressing for the last nine months. As head of the British station, Dr. Cockcroft will make periodic visits to Canada.

## PROOF OF STRENGTH

One can scarcely agree that the Church now stands for very little in our national and individual life when we have such repeated instances of its members coming to its real assistance in a financial sense. Instead, the success of these campaigns would appear to indicate that it retains its strength and that it must remain a force to be reckoned with, as it should be if this country is to be considered a Christian land.—Brookville Recorder and Times.

## A RARE OPERATION

WORCESTER, England.—A major and a private who each lost his right thumb in the fighting in Germany had the index finger of the same hand transferred to the position of the missing thumb. The rare and difficult operation, restoring the soldiers' grip was performed at the Ministry of Pensions hospital at Rinkwood near here.

## EARLY SURGERY

PERUVIAN INCAS are believed to have used coca leaves, from which cocaine is derived, as an anesthetic for their skull operations centuries ago.

## Alberta Coal

Discussion On The Moisture Content Is Settled

In the discussion which has been going on about Alberta coal, there has been some very dogmatic opinion given to the effect that the heavy moisture content of Alberta coal makes it unfit for long haulage and storage in Ontario. One grade of coal from Alberta is said to run as high as 15 per cent in moisture content which is five times that of the coal from Pennsylvania.

There is an interesting letter on this subject in the Toronto morning paper from E. B. Clarry, Trade Commissioner of Alberta. He points out that domestic coal is now being shipped to Ontario from the Mountain Park area, Alberta, which has a moisture content of 14 per cent, and that from the Cascade area is only one per cent. Mr. Clarry does not deny that some grades have a heavy wetness, but compares these grades to about the worst we get from Pennsylvania, and not infrequently it, that as many consumers know, the best of the Alberta product is better than the American coal, according to the Commissioner, if moisture content is the yardstick.

"Production is not great enough at the present time to permit the shipment of large quantities to Ontario. The coal is there, however, in superabundance. What is the moral? During the war with the enemy threatening the gate, we had a government performing a Herculean task and veritably moving mountains. Now the same government cannot move coal, Canadian coal, to the hard-pressed consumers of central Canada. Surely if this and that industry can be subsidized with public money, there is a strong case for the development of the coal and coal resources in the West, lying now virtually untapped as far as Ontario is concerned. As things are, ten shiploads of West Virginia coal, or even Russian coal piled up in the Homer dock area, would be a reassuring sight for consumers in this district. The condition for the coming winter points to stringent shortage, because of strikes in mines and water transportation, and also higher costs. Coal is one commodity on which the Wartime Prices Board must maintain the ceiling price, although inevitably it will be a higher ceiling.—St. Catharines Standard.

## Western Coal

B.C. And Alberta Mines Can Supply Millions Tons For Central Canada

The British Columbia Government mines department officials expressed the belief that British Columbia and Alberta coal mines could supply 1,000,000 tons of coal for central Canada but the shipments by rail would not be economical.

To meet an emergency situation in the east, the Dominion Government expressed hope that 1,000,000 tons of western coal would be available for Ontario and Quebec this winter. Officials said the supplies would come mainly from Alberta and British Columbia.

To Peel Right — Eat Right

## Used Imagination

Farm Boy Opened Up New Market For Electric Dells

A young Colorado farm boy with imagination a sales manager should covet has brought new income to his state's apple orchards and opened a new market for electric dells. The boy equipped a drill with a special arbor and felt pad to polish apples. Now farmers have copied his stunt, get higher prices for their clean, high-shine apples. The dells have become agricultural implements without a nickel of promotion.—Modern Industry.

Bread baking is one of the most ancient of human arts.

OUR "CUT-IN" ON  
WORLD SECURITY

No man, class, race or nation will  
ever be secure except in a moral  
world. A world that is free from fear  
hate and greed and hence from all  
human misdeeds motivated by these pas-  
sions.

We spend, therefore, far too much  
time debating whether world security  
can best be achieved through organ-  
izations, alliances, armaments, treaties  
or commissions. No one of these is  
more moral and hence more effective  
than any of the others. We may need  
to arm for self-protection. But let us  
realize that this is only a stop-gap  
till we work out the real solution. And  
then get immediately to work upon  
that solution.

Is there a way to end fear, hate  
and greed in the world? We have  
heard people say they used to be  
fearful and are not afraid any more.  
We have heard them say they used  
to hate and now are sorry. We have  
heard them say they were cut for all  
they could get and are living now to  
see what they can give. And their  
actions bear out their words.

This change is usually the result  
of finding reality in religion. They  
find that atomic energy is not the  
only universal force that can be tap-  
ped. And when they "cut-in" on the  
energy known as the "power of God,"  
they find it does things to their cour-  
age, to their sense of responsibility  
for other people and to the aims they  
had set for themselves.

To cut everybody in on this great  
great Force would produce the moral  
world which and which alone can  
bring lasting world security.

NEW BRITISH LIFEBOAT  
CANNOT CAPSIZE

A new lifeboat developed in B.B.I. is  
reversible, uncapsizable and self-  
emptying. These qualities have been  
proved by a series of highly successful  
tests by United Kingdom and U.S.A.  
authorities. During the United King-  
dom tests, the boat, known as the "Re-  
liance," retained its stability when  
loaded with sandbags equivalent in  
weight to sixty men. One American  
test included piling weights represent-  
ing 75 people, (12,375 lbs.) on one side  
of the boat but there was never any  
danger of capsizing. In another U.K.  
test a steam crane turned the "Re-  
liance" over several times while afloat.  
The boat shipped 40 gallons of water  
which ran out immediately. Further  
tests established that the boat would  
still be serviceable even if damaged in  
launching or after shrinkage caused  
by tropical conditions. A feature of the  
boat's construction are buoyancy  
chambers, housing hermetically sealed  
air tanks. The "Reliance" has an en-  
gine but can be rowed or sailed.

WHITEHORSE RESIDENTS  
SEE FIRST COW MILKED

Two Spokane families recently ar-  
rived in Anchorage after travelling  
the Alaska highway with the first

livestock known to come over the dif-  
ficult route.

They reported it was like carnival  
day when they showed up along the  
wilderness route with a cow, a calf  
and forty chickens.

They were Mr. and Mrs. Clark  
Peterson and their children bound for a  
homestead near Anchorage, and Mr.  
and Mrs. Melvin Croger and daughter,  
who provided a house trailer for the  
trip. Peterson had a truck and trailer  
for the livestock.

Peterson estimated 1,500 people  
turned out to see them milk the cow  
during the two days' stop at White-  
horse, where a cow had never before  
been seen.

INCREASE IN UNITED  
KINGDOM TAXATION

The tremendous increase in the  
United Kingdom's taxation per resu-  
lt of population, two wars and the "un-  
easy peace" between, were given by  
Hugh Dalton, Chancellor of the Ex-  
chequer, in Parliament recently. In  
1913-14 the rate per head was three  
pounds, eleven shillings, four pence.  
In 1944-45 it had risen to sixty-four  
pounds, three shillings, seven pence.

When a man gets too old to set a  
bad example, he starts giving good ad-  
vice.

There's no real benefit in getting a  
little from those who have more. Far  
better it is to learn a little from those  
who have more.

## ENGLAND'S EXAMPLE

Editor, Vancouver Sun, S.F.: Eng-  
land leads the world today in her eco-  
nomic and social progress and has  
evidently avoided the catastrophe that  
awaits us here by her "Cradle to the  
Grave" security. There is a lot more to  
be done by way of "leveling out,"  
but she is on the way.

We in Canada and the USA seem  
oblivious to the danger that befalls  
us.

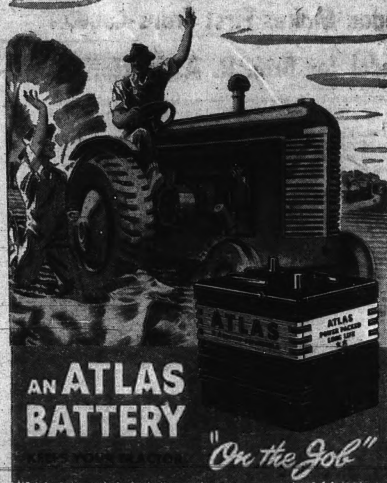

We have fertilized the ground and  
created a condition by our languid at-  
titude of mind that brings 'smiles to  
Moscow.'

These many strikes—justified or not  
—are the bridgeheads through which  
subversive forces are at work. If they  
are stronger than our government—  
and that seems obvious—we will not  
enjoy the orderly change with which  
the mother country has been blessed.

Shall we continue to stumble?

(COL.) H. E. LYON.

Eburne, Lulu Island, B.C.

POWER-PACKED  
FOR LONG LIFE!

Your tractor, your truck—it's vital they stay on  
the job these busy days around your farm! Don't  
take chances on a weak, worn-out battery that  
may let you down without warning, hold up  
your work and cost you money. Replace it now  
with a rugged, dependable ATLAS Battery...  
backed by Imperial Oil's written warranty...  
promptly and efficiently serviced when neces-  
sary by your nearby Imperial Oil dealer. You  
can't go wrong with an ATLAS... backed  
by Canada's largest oil company. See your  
Imperial Oil Dealer or Agent.

## Très Chic, Mr. Cholmondeley, but...

(A SIMPLE TALK TO SHOW HOW BANK CREDIT WORKS)

Mr. C. has dreamed up this creation for  
the fall trade. He's counting on its  
being a sensational success. And it will  
be... but later.

In the meantime he's short of cash.

He's used up most of his working capi-  
tal to buy materials. He needs money  
to keep his factory going, to pay his  
workmen, to meet other bills.

So he borrows from the Royal Bank  
and doesn't lose a day. And when his  
customers pay him, Cholmondeley  
pays off the bank.

It's as simple as that—a typical everyday

transaction between this bank and one  
of its business customers.

WOULD A BANK LOAN HELP  
YOUR BUSINESS?

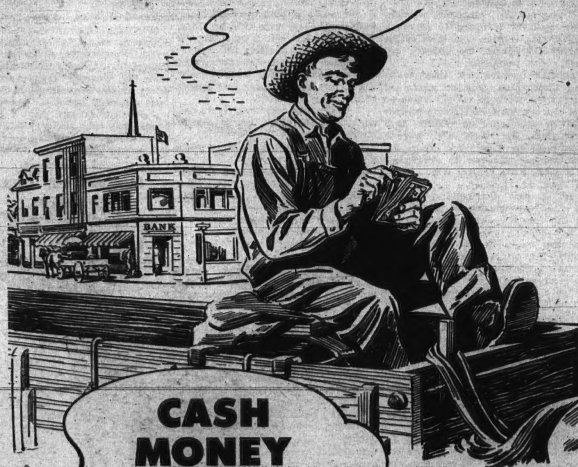

We are always looking for oppor-  
tunities to lend money for productive  
purposes to enterprises large and  
small.

If bank credit would further the pro-  
fitable operation of your business,  
have a talk with your Royal Bank  
Manager. He'd like to discuss it.

## THE ROYAL BANK OF CANADA

BLAIRMORE BRANCH - M. G. SMITH, Manager  
BELLEVUE BRANCH - L. B. LONG, Manager

-and some of it may come your way!

Yesterday Farmer Nelson got over \$800 cash when he  
sold his grain. Through the processes of trade and com-  
merce, some of that money may come to you. Banking  
service enabled him to obtain his money quickly.

The farmer doesn't have to wait for his money until his  
grain reaches the consumer... this is important to you, no  
matter where you live or what your work.

Farmer Nelson, and thousands like him, spend money for  
household and farm equipment, food, clothes, radios, paint  
and a hundred other things. This helps keep people busy all  
over the Dominion.

Your bank advances credit also to help farmers plant,  
cultivate and harvest crops of all kinds, to buy and raise live-  
stock. Banking service is something like the good oil in fine  
machinery, you never notice it. But it is a prime factor in your  
prosperity... in the Canadian way of life.

# ANOTHER "FIRST" FOR CHEVROLET

Brigadier R. A. Macfarlane, D.S.O.

## 1946 Stylemaster Sedan Makes First Trans-Canada Trip to Win Todd Medal for Brig. R. A. Macfarlane

DOWN "CANADA'S MAIN STREET"—The Trans-Canada Highway, which links province to province, from sea to sea, and opens the way to a great new era of tourist travel.

Rolling along "Canada's Main Street"—the Trans-Canada Highway—from coast to coast, Brigadier R. A. Macfarlane, D.S.O., at the wheel of a new 1946 Chevrolet Sedan, has just completed the first ocean-to-ocean automobile trip without leaving Canadian soil.

To win the A. E. Todd Gold Medal—offered in 1912 by the Mayor of Victoria—Brig. Macfarlane left Louisbourg, Nova Scotia, with the salt of the Atlantic on his rear wheels, and after nine days of driving he arrived in Victoria, Vancouver Island, B.C., and dipped his front wheels in the Pacific, having covered

**4,743 MILES**

The Chevrolet used was a stock 1946 model powered with a standard six-cylinder valve-in-head engine. It was selected by Brig. Macfarlane—who held the responsible posts of Director of Mechanization and Deputy Master-General of Ordnance, at Defence Headquarters, Ottawa—because he is convinced that a "sturdy, light, economical passenger car is ideal for the average Canadian citizen." With his extensive experience of army vehicles, on the testing grounds and on active service in two wars, Brig. Macfarlane made the new Chevrolet his choice for his history-making trip—another "first" for Chevrolet.

NEARING THE END OF THE TRAIL—J. V. Johnson and George Warren of the Victoria Automobile Club meet Brigadier Macfarlane and his Chevrolet a few miles outside Victoria and escort him into the City.

THROUGH THE ROCKIES—The Chevrolet spent thrilling hours skirting sheer precipices and climbing high mountain roads before it encountered this quiet little valley in Canada's Rocky Range.

THE AWARD—Winning of the Todd Medal, offered in 1912, became possible with completion of the Trans-Canada Highway. It is now awarded to Brig. R. A. Macfarlane for the first authenticated journey from Louisbourg, Cape Breton, to Victoria, B.C., over a specified all-Canadian route.

THE PACIFIC—After 4,743 miles of rapid, trouble-free driving, Brigadier Macfarlane and his co-driver dip the front wheels of their Chevrolet in the Pacific Ocean—to win the A. E. Todd Gold Medal.

**A Powerful Force**

SINCE THE FIRST ATOMIC BOMB was dropped on Japan the attention of the world has centred a great deal on the possibilities of atomic energy and its possible effect on the future. The discovery of this new and powerful force was one of the great milestones in history and thoughtful people everywhere realize that it has brought a new era in the affairs of man. Used as a weapon of destruction it could most completely wipe out the civilization which has been built up through the centuries and this possibility has added to the earnest desire felt in all countries for the elimination of differences between nations and the assurance of lasting peace. Never before in the history of the world has the alternative to peace been so terrifying.

### The Centre Of Many Problems

The Canadian Institute of International Affairs recently released an interesting pamphlet in which the relation of atomic energy and world government was discussed. The writer is Dr. Leopold Infeld, a noted Polish physicist and mathematician, and a former colleague of Einstein. He is now a professor of mathematics at the University of Toronto. Dr. Infeld points out that atomic energy is a problem that is now, and will for many years to come, be the centre of all technical, social and economic problems. This is a broad statement, but it is already clear that atomic energy is in some way connected with many of the most pressing problems of our times. The possibilities of its practical applications are many, and they may in time revolutionize many of our present practices and be of great benefit to all mankind.

### May Mean Either Life or Death

When atomic energy is applied to industry, Dr. Infeld suggests that the world will face a revolution much more far-reaching than that which came with the invention of electric power. The full development of atomic power suggests factories run by control machinery only, which would mean a reduction in the amount of labor required, and consequent far-reaching social and industrial changes. Such uses as that at present appear to be remote, and its applications to war are much more real. Problems of international relations are now more important than they have ever been before for, as Dr. Infeld concludes, the results and compromises achieved in this field may mean the difference between life and death, not to one nation alone, but of our entire planet.

### Living Longer

**Life, Expectancy In The United States Has Greatly Increased**

In 1944, for the first time in our history, the average length of life (expectation of life at birth) of the American people, including military personnel within the country, exceeded 65 years. The actual figure, 65½ years, is almost 16 years greater than at the beginning of the century.

As a result of this truly remarkable gain, the person of age 20 now has, on an average, as many years of life remaining as the newborn child had in 1900. Even more striking is the observation that, whereas according to the earlier mortality only three-quarters of the babies would attain age 25, under present conditions three-quarters of them will reach age 57.

For white females in 1944, the average length of life was 68.95 years. White females who have attained their first birthday anniversary will live, on an average, to age 71. For those who have attained their 49th birthday, the figure is 75 years.

The increase in longevity among white females in 1944, as compared with 1943, was two-thirds of a year. It was more than ten years over the average figure for 1910-1921, and almost 18 years over that for 1900-1902.

Although white males in 1944 reached a high level of 63.55 years in average length of life, their record was a little below the peak attained in 1942. The chief factor in this slight setback is the relatively high mortality from accidents among men in the military services. The gain in average length of life among white males since 1900 amounted to 15½ years.—Metropolitan Life Building.

### Reward For Inventors

**For Use During The War Of Designs And Processes**

A Royal Commission is being set up to decide what awards shall be given to inventors for use during the war of their "inventions, designs, drawings or processes" by British and Allied Governments.

Later the commission will arrange the procedure for submitting claims. Government employees will not be excluded from compensation for inventions but their contributions will be judged on the same footing as outside work.

American royalty rights on inventions will also be taken into account.

### EXAMPLE TO WORLD

**British Commonwealth Has Experience For All Who Care To Learn**

Mr. Vincent Massey, late Canadian High Commissioner in Britain, in his last public address before giving up that post:

"The British Commonwealth is today an example to the world which is running a race with catastrophe and which is looking so desperately for grounds of mutual understanding. The Commonwealth has resources which our example has to offer to all who care to learn from it.

One lesson which we can pass on to the fledgling United Nations is that of patience. The harmony of freedom and co-operation which we enjoy has not been won without setbacks and failures. Another hard lesson which our example has to offer is that institutions can be built successfully only when they are founded on aspirations. No such bond yet exists between members of the United Nations; they must be given every encouragement to agree. That will take time, and until then the Commonwealth cannot relax its vigilance.

The great inheritance which all of us in the Empire share has been fed from many streams. But the source from which our ideals have been spread out all over the world has been Britain; and although her partners are beginning to undertake the larger tasks Britain is still far and unequalled.

How urgent a need there is today for all that she can offer the world in leadership and guidance! If civilization would have perished in 1940 without British valor and British skill as it would today without the qualities which belong to Britain it will just as surely lose its way.

### FOR INDIAN NAVY

Three cruisers of the famous "Leander" class that defeated the pocket battleship Graf Spee in 1939 are to be acquired by the Royal Indian Navy, with the agreement of His Majesty's government. Indian personnel for manning the warships will be trained in the United Kingdom.

### RENEW WATER IN LAKE

LONDON—Eight million gallons of water were needed to fill St. James' Park lake—emptied during the war.

### Police Fly Body Of Slain Trapper To Sudbury

The body of Daniel Tessier, Dalton Mills trapper, murdered in the north, examination. Tessier was found near his Jackpine river home with a bullet hole behind the right ear. Police say he was shot from ambush.

### Price Control And Rationing Information

Q.—When do we receive more sugar coupons for canning purposes?

A.—On July 4 green sugar coupons \$17 to \$21 inclusive will become valid for the purchase of canning sugar, each coupon will purchase one pound of sugar. If you do not wish to do home canning, these extra coupons may be used for the purchase of canned fruit, commercially packed jams and jellies, sugar to supplement the regular ration.

Q.—I am a beekeeper and sell honey. Must I register with the Ration Administration?

A.—All beekeepers who produce honey for sale are required to register with the Ration Administration as Primary Producers of honey. Beekeepers who do not sell honey and who produce only for the use of their own households are not required to register with the Ration Administration.

Q.—I am planning on going to Eastern Canada for two or three months. Will I be able to obtain my ration book from a distributing centre while I am on my vacation?

A.—Ration books can be picked up at any convenient distribution centre, whether it be in one's own district or out of it, in one's own town or in another province altogether. Any person entitled to a ration book can get it at any one of the distribution centres in Canada.

Q.—Are the prices of fresh cherries controlled by the Wartime Prices and Trade Board?

A.—Yes, fresh cherries must be sold at prices set by the Wartime Prices and Trade Board.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your selling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

### WINTER WHEAT

Continues To Attract Attention In Southern Alberta

Winter wheat continues to attract increased attention in Southern Alberta. The two chief reasons of this are the premium paid for winter wheat and the scarcity of farm labor. Previous to the war, winter wheat usually sold at a discount of from five to ten cents per bushel below spring wheat, but during the war years it has commanded a premium of ten cents, the price that is still being paid for it. Many farmers who aim to hire little or no labor find that winter wheat helps considerably in solving their labor problem, so it usually ripens about two weeks earlier than spring wheat.

At the Dominion Experimental Station at Lethbridge winter wheat has been under test continuously since the station was established in 1907. In a rotation that was commenced many years ago Kharkov winter wheat, has given an average yield of 27.3 bushels per acre over a 28 year period, as compared with 25 bushels per acre for Marquis under the same conditions, and only one complete failure occurred from winter killing during that period.

Kharkov, preferably the Kharkov M.C. 22 strain, is still one of the best varieties. Yogo is also a good variety. Many farmers prefer a hardheaded variety and generally choose Jones' Rife (often called Velvet Chaff). This variety yields well and frequently gives good results under ideal conditions, but it shatters readily and is definitely less winter hardy than the other two varieties mentioned.

The first week in September appears to be the best time to seed winter wheat in Southern Alberta. Earlier sowing gives the ground more protection against wind erosion but when sown too early damage from root rot usually occurs.

### Atomic Bombs

**United States Has Developed Long Range Planes To Carry The Load**

DETROIT—The United States has developed a bomber capable of flying from this country "to drop an atomic bomb on any industrial centre in the world," said W. Stuart Symington, Assistant Secretary of War for Air.

"If we can do it," he said, "others can do it too."

In addition to the Economic Club of Detroit, Symington revealed for the first time the full capabilities of the Army Air Force's new B-36 bomber, and the recently unveiled B-35. Both, he said, can fly 10,000 miles with an atomic bomb.

With such new planes in the air, he pointed out, "the Polar path of air routes will be more important than any others."

In addition to atomic bombing operations made possible by the new long-range planes, Symington said, the blueprint for the post-war U.S. Air Force also will emphasize the value of guided missiles and rockets for attacks of atomic bombs.

Symington warned, however, against "too much economy" in planning future American air power and charged that there already was "the same old talk" about restricting the U.S. Air Arm.

### SCOUTS NEEDED

The Boy Scout movement is needed, more than ever before, to improve the sentiment and good feeling between all races, Viscount Alexander, Governor-General of Canada, said at the annual meeting of the Canadian General Council of the Boy Scouts Association.

### TOP PILOTS

British Overseas Airways Corporation has a name for 52 of its pilots—millionaires. Each has flown more than 1,000,000 miles.

**Stop the Itch**

Of Insect Bites—Heat Rash

Quick! Stop itching of insect bites, heat rash, corns, blisters, sunburn, eczema, athlete's foot and other skin troubles. Use the quick-acting, soothing, antiseptic B. B. B. Itch-Stop. It soothes, heals, and keeps the skin cool and comfortable. Your druggist stocks it. B. B. B. Itch-Stop.

### OGDEN'S

**I.P. MEMBER SENTENCE**—"I have done nothing against the people of Canada and I still insist that I am innocent." After saying these words, Fred Rose, Labor-Progressive M.P. for Montreal-Carrier, was sentenced to six years in penitentiary for conspiracy to transmit secret information to Russia.

### Medical Services

**For Indians And Eskimos To Be Improved**

Improvements in medical services for Indians and Eskimos were urged in the Commons by John R. MacNicol (P.C., Toronto Davenport) during consideration of health estimates. Mr. MacNicol welcomed an increase of \$1,577,380, from \$2,526,000 to \$4,103,380, in this year's appropriation for such services. He said he was interested in a "real change for the better" and suggested the establishment of more small hospitals near reservations.

He also recommended that the teachers in Indian schools be given a course, possibly during the summer holidays, in first aid. This would enable them to tend minor ailments and injuries for the Indians.

### Threat To Shipping

**Estimate Places Japanese Mines Adrift In Pacific At \$6,000**

An estimated 30,000 Japanese mines adrift in the Pacific have been classified as a continual threat to shipping by Rear Admiral Arthur D. Strubbe, commander of the Pacific amphibious forces. Simultaneously, the Star-Bulletin said six ships, including five American vessels, had been damaged by mines since V-J Day and that stray mines had been sighted in Hawaiian waters and one only 600 miles off San Francisco.

### GEMS OF THOUGHT

#### RIGHT OR MIGHT?

If mankind had wished for what is right, they might have had it long ago.—William Hazlitt.

It has been said of the world's history hitherto that might makes right. It is for us and for our time to reverse the maxim, and to say that right makes might.—Abraham Lincoln.

God reigns, and will "turn and overturn" until right is found supreme.—Mary Baker Eddy.

So let it be. In God's own night We gird us for the coming fight, And, strong in Him whose cause is ours

In conflict with unholty powers.

We grasp the weapons He has given, The Light, and Truth, and Love of Heaven.—Whittier.

Nothing but the right can ever be expedient, since that can never be true expediency which would sacrifice a greater good to a less.—Whately.

No man has a right to do as he pleases, except when he pleases to do right.—Simmons.

#### ELECTED PRESIDENT

WINNIPEG.—N. McRae, of the Alberta school of agriculture, Vermilion, was elected president of the western Canadian society of agronomy at the closing session of a two-day conference.

## Ration Coupon Charges Are Laid In Quebec

OTTAWA.—Robert Mayhew, parliamentary assistant to Finance Minister Fliley, disclosed in the commons that "at least" four employees of the Bank of Provinces du Canada are under arrest on charges of "black marketing" in connection with ration coupons held by the bank.

Mr. Mayhew, making a statement requested earlier by John Diefenbaker (P.C.—Lake Centre), said three of those held had admitted their guilt and added that more than one branch of the bank, which operates in Quebec province was involved.

The arrests are made in connection with "irregularities" which led the prices board to announce earlier that it was cancelling its ration coupon banking arrangements with the bank at the end of July.

The type of ration coupons involved was not disclosed.

Mr. Mayhew said it was impossible to state the ramifications of the black market operations but they did involve merchants as well as bank employees. Nor could he say how long they had been going on because this might prejudice the government's case against the accused.

Mr. Mayhew said there was certain information which could not be disclosed where "crookedness" of this type was involved.

He said the prices board had had "considerable" difficulty with the bank about proper operation of the coupon banking system and there were not sufficient safeguards of coupons and coupon accounts. The bank did not appear willing to cooperate.

The reason the coupon banking arrangement was being cancelled July 31, rather than immediately, was that it was necessary to make advance arrangements elsewhere.

He added that the board would be willing to re-institute the system if the bank would be willing to take proper precautions.

Ordinary accounts in the bank were not affected by the investigation.

## HECKLING BANNED

Members Of Japanese Diet Decide Against Stormy Sessions

TOKYO.—Representatives in the lower house of the Japanese diet have agreed to ban heckling and booing in the future as a measure of self-censure for a recent uproarious diet session.

It was agreed that legislators especially should never shout "baka" (idiot).

The word was used frequently during a stormy meeting when members swung at each other and spectators screamed in the galleries.

## PRODUCTION SHORT

SINGAPORE.—Rice production in Burma and Java probably will be more than 600,000 tons short of internal needs this year, an R.A.P. aerial survey disclosed.

## TROOPS WITHDRAWING

BEIRUT, Lebanon.—British troops have been withdrawing from the Lebanon according to plan during the last three months. British headquarters announced. Only 1,500 remain, the announcement said.

## RETAIN RANK

Announcement Made At Ottawa In Reference To Reserve Men

OTTAWA.—Defence headquarters announced that reserve officers and non-commissioned officers could retain their rank in the reserve army.

The announcement explained: "In reorganizing the non-permanent active militia as the reserve force, it is desirable that the knowledge and experience of wartime soldiers be made available to reserve units and authority therefore has been granted for such units to carry, in certain specified ranks and numbers, ex-active service personnel supernumerary to the authorized establishment."

Officers, W.O.'s and N.C.O.'s with actual battle experience will be given preference and those selected may carry the substantive rank they held at the time of discharge.

## Made A Record Airway Trip Across Atlantic

NEW YORK.—British overseas airways brought 53 men, women and children from London to New York—a record for any single east-to-west crossing—and one of them was elderly Sir Arthur Whitten-Brown, the man who "started all this ocean-crossing business" 27 years ago.

It was the first Atlantic air crossing for Sir Arthur since 1919 when he and the late Sir John Alcock made aviation history with a 15-hour 57-minute non-stop flight from Newfoundland to Eire.

In 16 hours, 43 minutes of flying the plane on which I was a passenger had travelled almost twice as far as he and Alcock made to win the Daily Mail's £10,000 prize for a flight across the ocean.

Sir Arthur admitted he enjoyed the flight "a lot more than my last one," because "after all, this time I didn't have any worries."

With that, attempts to interview him had to end though 11 other empire newspapermen aboard the big four-engined royal mail airliner Bangor II argued he was the best story of their trip.

He was one of the newspapermen himself, assigned by the Daily Sketch to cover this last east-to-west proving flight before government-owned B.O.A.C. launches its new regular London-New York passenger and mail service with two services weekly in each direction.

By Sept. 1, if present plans go through, there will be daily flights. The B.O.A.C. gave its newspaper guests and other passengers a demonstration of good organization and efficiency. There were books and crossword puzzles, cold meals and frequent snacks, drinks from the air-liners bar—provided by three stewards. Mothers who forgot the baby's bottle found the galley stocked with plenty—and with special baby foods as well.

## TOOK ACTIVE PART

BRISBANE, Australia.—The Duke of Gloucester, governor-general of Australia, recently took an active part in the "flying doctor" service of which he is a patron when a plane he was using during his tour of Queensland went on a mercy trip to bring a sick man from an outlying cattle station.

CHAIRMAN OF U.N.—Dr. Francisco Castillo Najera of Mexico, new chairman of the United Nations security council, will preside at discussions of the atomic bomb. The Mexican delegate takes over as chairman for a month.

## FOREST DESTROYED

Game—Patrols—Thinks—Cyclone

Caused Damage Near The Pas THE PAS, Man.—Game patroler Ted Reader of The Pas reported he had come across an area of timber, about 1/2 mile square, which had apparently been devastated in a cyclonic storm. He said not a tree remained standing and in many cases the trunks even had been shredded. The damage is believed to have been done during a severe storm which struck The Pas June 9.

ROYAL AERIAL INSPECTION.—The fly past of 300 R.A.F. aircraft over the saluting base to end the Victory parade in London is watched by the King, Queen and Princess Margaret Rose.

## MAKE FIRST TEST

Practice Bomb Was Dropped On Target Fleet Off Bikini

ABOARD THE U.S.S. MT. McKinley.—When the "Queen Day" atomic test bomb was dropped, a ball of orange flame hurtling from the practice bomb close to the centre of the target fleet off Bikini punctuated the final rehearsal for the "able day" test schedule later.

Correspondents aboard the flagship at a distance of slightly more than 10 miles from the practice bomb said the bomber appeared to explode between the battleship U.S.S. Nevada and the light carrier Independence at a height of 1,000 to 1,500 feet. Observers on the flagship were unable to see the B-29 which released the practice bomb.

## HIGHER PRICES

Cost Of Production Will Injure Canadian Trade

WINNIPEG.—The great danger in Canada at present is that cost of production will become so high that Canadian goods will be unable to compete in world markets. Don G. McKenzie, chairman of the board of grain commissioners, said.

Mr. McKenzie told the annual meeting of the Canadian seed growers' association that Canadian exports now were worth from two to five times as much as they were before the war.

## WARN TOURISTS

SUDBURY, Ont.—Game conservation officials warned tourists returning from northern Ontario to investigate any parcels which backwoods residents may ask them to transport to Toronto or Montreal. Such parcels might contain beaver skins with a value of thousands of dollars in the black market, they said.

## REAL TRAFFIC JAM

Bringing Wives Of Canadians From Overseas Is Big Job

OTTAWA.—Cupid has caused some queer muddles in his time and a traffic jam—between Britain and Europe and Canada—is his latest.

The traffic is in shipping and the passengers are wives of Canadian servicemen most of whom are already back home. In the United Kingdom at June 1 there were 19,389 wives and 9,729 children, and in northwest Europe 2,328 wives and 71 children all waiting transport to Canada Defence headquarters said.

A dozen times a day the army mops its brow, answers the phone and tells some anxious husband to be patient just a little longer and they will get his wife safely back to him.

No date can be set for the last shipment of wives because Canadians still are marrying in large numbers and babies are being born daily. In March this year 4,968 wives and 1,536 children sailed to this country. In the same month there were 1,215 marriages and 285 births. The rate of marriages in Europe has increased and branches of the Canadian wives bureau have been set up in Paris, Brussels, The Hague and Amsterdam.

## Garson Favors The Dominion Tax Proposals

TORONTO.—Premier Garson of Manitoba said that "sensible co-operation between the provinces and the Dominion under a Dominion-provincial agreement is the best way to preserve confederation" and "a good way to wreck our post-war prospects" is to return to a tax structure like that of the 1930's.

In an address to a luncheon meeting at the annual conference of the Chemical Institute of Canada, Mr. Garson said Manitoba was prepared to accept the Dominion proposal for a three-year tax agreement "not because it was perfect, but because we thought the provinces would be much better off with the agreement than they would be with no agreement."

The Manitoba premier replied to arguments advanced against the Dominion government plan which proposed that the provinces vacate personal and corporation taxes and succession duties for three years in return for a guaranteed minimum annual payment of \$18,000,000, subject to increases in provincial population and national income estimated to bring it to \$196,000,000 by 1947. The Dominion also agreed to act to enable provinces to levy indirect retail sales or turnover taxes.

An argument against the Dominion plan was that it did not provide for an end to federal taxation on gasoline, amusements, pari-mutuel, betting, security, transfers, electricity and estates. It was argued the provinces should hold these fields exclusively to relieve them of dependence on Dominion subsidies and enable them to maintain their autonomy.

But "in the light of the Dominion's willingness to give effect to the provinces' unanimous request to impose an indirect retail turnover tax—which would be more productive than all of these minor fields put together—this autonomy argument does not seem too impressive."

## No Sure Peace Until Nations Uphold The Law

OTTAWA.—"We are convinced that there cannot be lasting peace until the nations accept and uphold a rule of law and we are most of us prepared for some merger of sovereignty to make possible that rule of law." Rt. Hon. Anthony Edson, former British foreign minister, told the Canadian branch of the Empire Parliamentary Association in Ottawa.

He was referring to relations between the major powers in the world today, the United Kingdom, the Soviet Union and the United States, and the "immeasurable pain to the world" if true understanding and loyal collaboration could be established between the three nations.

Despite the anxieties and disappointments of the present period he was not a pessimist for the future of international collaboration, he said. "If we put first things first, if we hold to our faith, not as a threat to others but as our own daily and abiding inspiration, if we make plain to all our Allies that neither our faith, nor our friendships are exclusive and that the doors are open to all, if we are firm but cool and reasoning, we shall win through. The clouds are heavy and sullen. But we have faced worse odds than these, we shall yet reach the sun-splashed lands beyond."

He added, "there is, as I believe, no major power on this earth today and that is in a position to make war and that has it in its heart to do so."

## DOES GOOD JOB

U.S. Paper Praises Canada For Handling Of Price Controls

NEW YORK.—The New York Herald Tribune in an editorial compared the handling of price and wage controls in Canada and the United States and concluded that the Dominion had done a better job.

"Canada showed the way to this country in bringing prices and wages under control during the war," the editorial said, "and is now, it would seem, giving us a lesson how to handle the task of decontrol during the period of reconversion."

There had not been violent controversy over price control in the Dominion, as there was in the United States, and Canada had held the wartime and postwar increases in living costs to approximately 20 per cent, compared with 23 per cent in United States.

"When Canada adopted wartime price control she did it courageously and boldly, but our government shrank from applying controls until virtually shamed into doing so by the Dominion's action," the Herald Tribune said.

## A FAVORITE

Winston Churchill Is Extolled By The Czech People

KIRKLAND LAKE, Ont.—Dr. Joseph Kofsky, Czechoslovakian consul-general at Montreal, told a gathering of several hundred Slavs that Winston Churchill is the "most popular man in Czechoslovakia today." Churchill was a sign of hope to the Czechs during the war and is still regarded by them as their champion, he said.

## Members Of Parliament And Senators Pay High Tribute To Prime Minister King

Complimentary dinner to Prime Minister King was attended by all members of parliament and the Senate at Ottawa. The dinner was a crowning tribute to the prime minister who has spent 40 years in public

life, 25 as leader of the Liberal party and 19 as premier. Mr. King said he would not contest another election although he hoped to spend a few more years in parliament. He is shown here with John Bracken, Pro-

gressive Conservative party leader, left, and Hon. Ian Mackenzie, right chairman.

## Every Young Husband

...should answer these questions:

Were the EXPENSES of starting your home greater than you expected? In most cases the answer is "yes." Probably there is a mortgage and other debts. Given time, you can pay them! But they could be a burden to your wife, if something should happen to you. That is one reason why you should have adequate life insurance protection.

Does it matter which COMPANY you insure with? Yes! Life insurance companies are much alike as to policies and rates, but actual long-term results vary widely. Evidence of

the satisfaction of Mutual Life policyholders is furnished by the fact that whole families and succeeding generations have entrusted their life insurance programs exclusively to The Mutual Life, and each year approximately 35% of its new business comes from policyholders. Ask your Mutual Life representative to explain the special features of this Company.

## The Only Remedy for Hunger is FOOD!

The most efficient way in which we can send increased bulk shipments of WHEAT, MEAT, CHEESE and EGGS to needy countries is through the Canadian government food boards. These increased bulk shipments can only be made providing we reduce our own consumption. Here are five important ways by which we can make greater quantities of food available for export:

- (1) BUY AND USE LESS BREAD, FLOUR AND OTHER WHEAT PRODUCTS, MEAT, CHEESE AND EGGS, SUBSTITUTE VEGETABLES, FRUIT AND FISH WHERE POSSIBLE.
- (2) KEEP YOUR HOME STOCKS LOW - BUY ONLY ENOUGH FOR IMMEDIATE REQUIREMENTS.
- (3) AVOID ALL WASTE.
- (4) GROW A VICTORY GARDEN AGAIN THIS YEAR. PLANT MORE THIS TIME IF YOU CAN.
- (5) DONATE ANY MEAT COUPONS YOU CAN SPARE. ENQUIRE AT YOUR LOCAL RATION BOARD.

Share with the hungry!

## Local and General Items

Miss Selon and Mrs. L. Martin left for Edmonton on Sunday.

Mrs. H. Dixon, of Haney, Sask. is visiting at the home of her mother, Mrs. Royle.

Mr. and Mrs. "Dick" Herbert are receiving congratulations on the birth of a son on June 7th.

Born to Br. and Mrs. M. Aschacker, of Blaimore, at Germaine's Maternity Home, a son, on July 2nd.

Mrs. W. Radulski and children are spending two weeks vacation at the home of her sister in Calgary.

Mr. and Mrs. Jack Patterson spent the holiday week end in Kimberley visiting their sons Jim and Alex.

Mr. and Mrs. John Kerr jr. and daughter have moved to Lethbridge, where they will reside permanently.

Mr. Anthony Pomahac jr., of Frank, has been employed for the summer months at the Blaimore Pharmacy.

Mr. and Mrs. Armand Mission returned to Blaimore, after spending a month's vacation in Oakland, California.

Ms. John Spreha, who resides in the Bronx, New York City, is visiting relatives and friends in the Pass this week.

Mr. and Mrs. F. Telfer were down from Blaimore to attend the farewell party for Mr. and Mrs. D. Garrick, -Pincher Creek Echo.

Mr. and Mrs. Steve Winnick, of Blaimore, are spending a week's vacation in Lethbridge. While there they will take in the Stampede.

Mr. A. Ferguson, of the high school staff, left for Vancouver, B.C. on Wednesday, to travel by boat to Prince Rupert to spend his vacation with his parents, Mr. and Mrs. A. E. Ferguson.

The three great menaces on the highways these days, according to authorities, are drunken driving, uncontrolled thubbing, indiscriminate spooning. To put it briefly: Hic, Hike and Hug.

Walker Perry, after an absence of nine years, is visiting his parents, Mr. and Mrs. Ralph Perry. Walker has spent the past six years in the ROASC and expects to get his discharge shortly.

This district was well represented among winners at the Macleod Stampede. Charlie Gilmar, of Blaimore, captured first money in the bareback riding event. Charlie Yagos, of Cowley, tied for second and third in the saddle event and Mike Yagos was fourth.

Sandy Porter, of Lundbreck, was fourth in calf roping, time 23 flat, while Frank Chowers, of Coleman, third in boy's steer riding.

Among those receiving Dominion Day honors are Robert Livett, of Calgary, president of District 18, UMW, who received the MBE (member of the civil division of the Most Excellent Order of the British Empire). Livett was at one time resident of Bellevue.

Matthew Halton, formerly of Pincher Creek, was honored for his services as war correspondent by receiving the OBE (Order of the British Empire).

A very pleasant evening was spent at the home of Ms. Bert Sennier on Saturday last, when some of her many friends paid her a surprise visit and presented her with a beautiful vase and flowers (roses, carnations and gladiolas) and an anniversary cake; also a corsage, the gift of Mrs. Minnie, the occasion being her wedding anniversary, June 30. Court whist was enjoyed during the evening, honors going to Mrs. A. Brown, first, and Mrs. C. Fraser, second. A dainty supper was served, when the cake was cut, after which all departed well pleased with the good time spent. It was a real surprise and deeply appreciated.

Mrs. I. Christie, of Pincher Creek, was a Blaimore visitor yesterday.

Mrs. Gus Howe is a patient in the local hospital, being admitted this morning.

Mr. and Mrs. F. Galvon spent the long week end at Kalispell and other U.S. points.

In the local baseball tournament on July 1st, Hillcrest defeated Blaimore 6-4 in the finals.

A wife takes credit for all her husbands virtues, but holds him responsible for his weaknesses.

A large crowd attended the opening of the Turtle Mountain Playgrounds swimming pool on June 30th.

Dr. B. Goodwin, of Edmonton, is relieving Dr. Stewart while on holiday with his family in the Nelson district.

Mr. and Mrs. Arthur Williams, will b in Lethbridge for the Rodeo and hope to attend the Calgary Stampede also.

Mrs. J. Sheremeta and young sons, of Lamont will spend their holidays with the former's parents, Mr. and Mrs. E. Morgan.

When you talk you only say something you know. When you listen you learn what someone else knows. So give your ears a chance.

Mr. and Mrs. J. J. Murray, were visitors to the Kimberley district for the holiday week end, guests of their daughter, Mrs. Bill Rogers, and Mrs. Rogers.

Mr. and Mrs. Wm. Barclay, of Beaver Mines, celebrated their golden wedding on June 5. They will be "at home" at the Alex. Barclay home on July 14, to their many friends.

Mr. Johnny McDonald, accompanied by Mr. and Mrs. J. Cyr, of Blaimore, motored to Calgary on Wednesday. While there Johnny met his wife who recently arrived from overseas.

Mrs. J. McKelvey will leave next week for Sylvan Lake, as leader at "Camp Council." Jean McKelvey and Bonnie Gilmar will attend CGIT camp also at Sylvan Lake.

Haig Wilson, of Blaimore, was a week end guest of Mr. and Mrs. W. B. Miller. While in the city Mr. Wilson took part in the golf tournament.

The service at the United Church Sunday evening will be held in the auditorium as the redecorating of the church building is still in progress. Sermon subject - "Why be a Christian?" The Sunday school sessions will be discontinued during July and August.

Two former Pincher Creek girls, Mrs. E. G. Montabetti, of Blaimore, and Mrs. E. E. Bradburn, of Vancouver, are "back home" this week. Mrs. Bradburn is staying with her parents, Mr. and Mrs. H. Bosenberry, while Mrs. Montabetti is the guest of her brother, F. Frey. -The Echo.

George Shearer, accompanied by his mother, Mrs. A. Shearer, of Chapman Camp, was a visitor to the Pass last week, calling on Bob Shearer and family. Before returning from the holiday trip George and his mother will visit other relatives in Lethbridge and Coramotion.
